Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roberts et al in view of Manning. The patent to Roberts teaches structure substantially as claimed including a platform, rounded edges, the bottom and top functionally interchangeable, cavities on one side, substantially flat on the other side, the only difference being that the reference does not specifically state that the structure is made from a blow molded plastic and the structure does not include a drain. However, the patent to Manning teaches the use of a plastic structure including a drainage hole in the surface. It would have been obvious at the time of the invention to modify the structure of Roberts et al to include a drainage hole, as taught by Manning since such structures are conventional structures used in the same intended purpose. thereby providing

Art Unit: 3637

structure as claimed. It is noted that the hole of Manning inherently provides for a means to drain. The particular color would have been a matter of desirability and would have been obvious and well within the level of ordinary skill in the art. The use of blow molded structure in the formation of particular plastic structures, the use of dowels as an anchor is well known in the art and applicant is given judicial notice of such.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Buck et al, Kelso, MacLeod, Engler, Jr., Vance et al, Eschbacher et al, Mahler, Everitt, Kellough, Lundstrom teach structure similar to applicant's.
